

❖ **FutureBlox** is one of the leading cloud computing consulting service providers. We offer cloud services that are scalable, flexible and cost efficient.

❖ FutureBlox as a Cloud Partner: Being a remarkably experienced IT infrastructure management provider, we are also a preferred Cloud partner. Our Cloud support portfolio includes services, such as:

❖ 24/7 monitoring services ensured that the issues in the infrastructure were identified on a pro-active basis and helped to take corrective actions in advance.

❖ Monitoring the internet usage and bandwidth helped the client management identify problem areas and restrict internet access based on business requirements.

❖ Monitoring the resource utilization of servers on a 24/7 basis resulted in 99.99% availability of services throughout the year.

❖ FutureBlox developed IT Policies and Procedures for the company.

❖ We also prepared the process documents, which were required for compliance, maintained Standard Operating Procedure (SOP) documents, handled asset management and license management.

❖ Below are the policy documents developed and published by FutureBlox for this project:

o Acceptable Use Policy

o Backup Policy

- o Change Management Policy
- o Information Security Policy
- o Incident Response Plan
- o Patch Management Policy
- o Network Security Policy
- o Physical and Environmental Security Policy
- o Incident Management Policy
- o Antivirus Policy
- o Data Retention and Data Destruction Policy

Support Methodology

- ❖ FutureBlox provided support remotely from our operations centre in India.
- ❖ Hands on support was provided by onsite Engineers from the in-house team.
- ❖ FutureBlox implemented a secure VPN tunnel to the client location and provided support remotely using remote management tools, such as Team Viewer and Windows Remote Desktop was used.

Senior Manager (Infrastructure and Cloud)

A seasoned service delivery manager with more than 16 years of experience, Hareesh manages service delivery for global clientele. His vast experience in managing teams providing monitoring, helpdesk, server, cloud, and DevOps support makes him one of the experts in the industry. He is also well versed with compliance standards, such as PCI DSS, and ISO.

History

FutureBlox was founded in 2010 as Nocme Technologies Pvt. Ltd. in Technopark, Trivandrum, with eight employees.

2013 – Major expansion for Nocme when it acquired new customers for its Cloud Support Services division

2015 – Started rolling out DevOps services and acquires new major clients from across the world for its DevOps Vertical

2016 – Nocme merges with SC Soft Singapore giving a huge push to its breadth of services. The new company starts implementing and supporting IT Infra projects for the AFC domain.

2022 – Nocme and SC Soft split and FutureBlox is born. The new company focuses on high-value Managed IT services.
